Issue

Configuring client workstations to download virus signature database updates directly from ESET

You cannot or do not want to [use a local update Mirror server](#)

A new version has been released

Version 6 of ESET Remote Administrator (ERA) and ESET business products were released in North America December 11th, 2014, and globally February 25th, 2015. This article applies to version 5.x and earlier ESET business products. For information about what's new in the latest version and how to upgrade, see the following article:

Details

Solution

If you do not use ESET Remote Administrator to manage your network

[Perform these steps on individual client workstations.](#)

From the ESET Remote Administrator Console (ERAC)

1. Open the ESET Remote Administrator Console by clicking **Start → All Programs → ESET → ESET Remote Administrator Console → ESET Remote Administrator Console**.
2. Click **Tools → Policy Manager**.
3. Select the policy you want to modify and click **Edit Policy**.

8. Click **Console → Yes** to save your changes. Click **OK** to exit

Policy Manager. You have just configured all clients reporting to ESET Remote Administrator to update directly from ESET servers using your Username and Password to authenticate.

On an individual client workstation

1. Open ESET Endpoint Security or ESET Endpoint Antivirus. [How do I open my ESET product?](#)
2. Press **F5** to access Advanced setup.
3. Expand **Update** and click **General**.
4. Make sure **Choose automatically** is selected from the **Update server** drop-down menu and ensure the correct ESET-issued Username and Password are entered into the the **Username** and **Password** fields.
5. Click **OK**.
