## How do I configure endpoints to use different update settings depending on the network they are connected to? (6.x)

Ondersteuning | ESET Nederland - 2017-11-08 - Reacties (0) - Legacy

<https://support.eset.com/kb3682>

### Issue

---

Use dynamic groups to ensure that client workstations automatically use different update settings depending on the network they are connected to

### Solution

---

#### Permissions changes in ESET Remote administrator 6.5 and later

Before proceeding, please note important changes to user access rights and permissions in the latest versions of ESET Remote Administrator.

[View Permissions Changes](#)

A user must have the following permissions for their home group:

<b>Functionality</b>	<b>Read</b>	<b>Use</b>	<b>Write</b>
Policies	✓	✓	✓
Dynamic Groups Templates	✓	✓	✓

A user must have the following permissions for each affected object:

<b>Functionality</b>	<b>Read</b>	<b>Use</b>	<b>Write</b>
Groups & Computers	✓	✓	✓

Once these permissions are in place, follow the steps below.

### About the example below

In the example below, a group of client workstations will be configured to:

Download updates using a proxy server when connected to subnet A (referred to as "Company Network").

Download updates using the ESET update server when connected to subnet B (referred to as "Off Network").
