How do I configure ESET Endpoint Security to use different firewall settings in different locations?

Ondersteuning | ESET Nederland - 2025-03-07 - Reacties (0) - Legacy

https://support.eset.com/kb3478

Issue

Create multiple Personal firewall profiles for use on different networks (for example, public WiFi or corporate LAN)

Automatically switch between profiles when you enter or leave a trusted network, subnet or LAN

Enable automatic switching for Personal firewall settings

Details

Solution

> ### If you use ESET Remote Administrator to manage your network
>
> Perform these steps in ESET Remote Administrator.

Configure Endpoint Security to use different firewall settings on individual client workstations

I. Define your zone

II. Create your Personal firewall profile

I. Define your zone

1. Open the main program window of your Windows ESET product.

2. Press the **F5** key to open **Advanced setup**.

3. Click **Firewall**, expand **Advanced** and click **Edit** next to **Zones**.
