Issue

Disable password protection for policy settings on client workstations

[Perform these steps on the latest version of ESET Remote Administrator \(5.x\)](#)

Solution

1. Open the ESET Remote Administrator Console (ERAC) by clicking **Start** → **All Programs** → **ESET** → **ESET Remote Administrator Console** → **ESET Remote Administrator Console**, or by double-clicking the ERAC icon on your desktop.
2. In the ERAC, click **Tools** → **Policy Manager**.
3. Select your default server policy and click **Edit**.
4. In the **Configuration Editor** window, expand **ESET Smart Security**, **ESET NOD32 Antivirus** → **ESET Kernel** → **Setup** → **Protect setup parameters**.
5. Click **Password to unlock** → **Set Password**.

Click the image to view larger in new window

6. Click **Delete**, then click **OK**.

Figure 1-2

7. Click **Console**, and click **Yes** when prompted to save your changes.

These changes will take effect the next time client workstations assigned this policy check in to the ESET Remote Administrator Server.
