ESET Tech Center

How do I run a Computer scan on a client workstation? (5.x)

https://support.eset.com/kb3554

Issue

Use ESET Remote Administrator to scan specific client workstations for malware, or perform a scan on an individual client workstation

Details

Solution

> ### If you do not use ESET Remote Administrator to manage your network
>
> Perform these steps on individual client workstations.

Scan client workstations using ESET Remote Administrator

1. Open the ESET Remote Administrator Console by clicking **Start → All Programs → ESET → ESET Remote Administrator Console → ESET Remote Administrator Console**.

1. Select the client workstations you want to scan, right-click, and click **New Task → On-Demand Scan**.

Scan individual client workstations

Click **Tools → Log files**.

Select **Computer scan** from the **Log** drop-down menu. Double-click the line representing the most recently completed scan. A new **Computer scan** window will appear and display the scan log details.
