Manage the Quarantine in ESET PROTECT (8.x)

Steeff | ESET Nederland - 2020-12-10 - Reacties (0) - Legacy

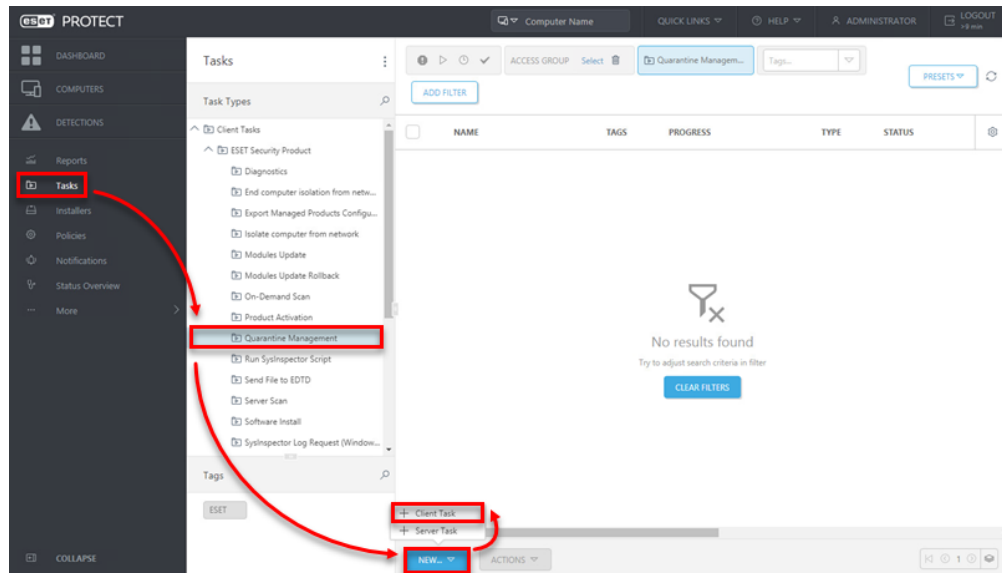

Issue

- [Create a Quarantine Management task](#) to restore, restore and exclude, or delete objects in the Quarantine from the ESET PROTECT Web Console
- [Manage the quarantine on an individual client workstation](#)

Solution

Create a Quarantine Management task

1. [Open ESET PROTECT Web Console](#) in your web browser and log in.
2. Click **Tasks** → **Quarantine Management** → **New** → **Client Task**.

3. Type a name into the **Name** field and click **Settings**.

5. Select the object from the list of quarantined files and click **OK**.

6. Click **Finish**.

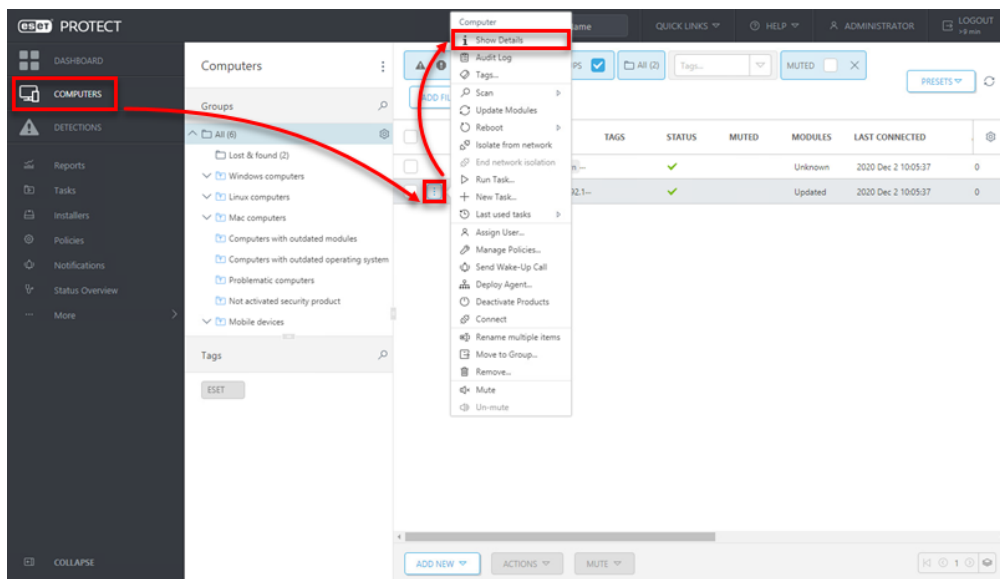

7. Click **Create Trigger** to [create a trigger and add target computers for the Client Task](#).

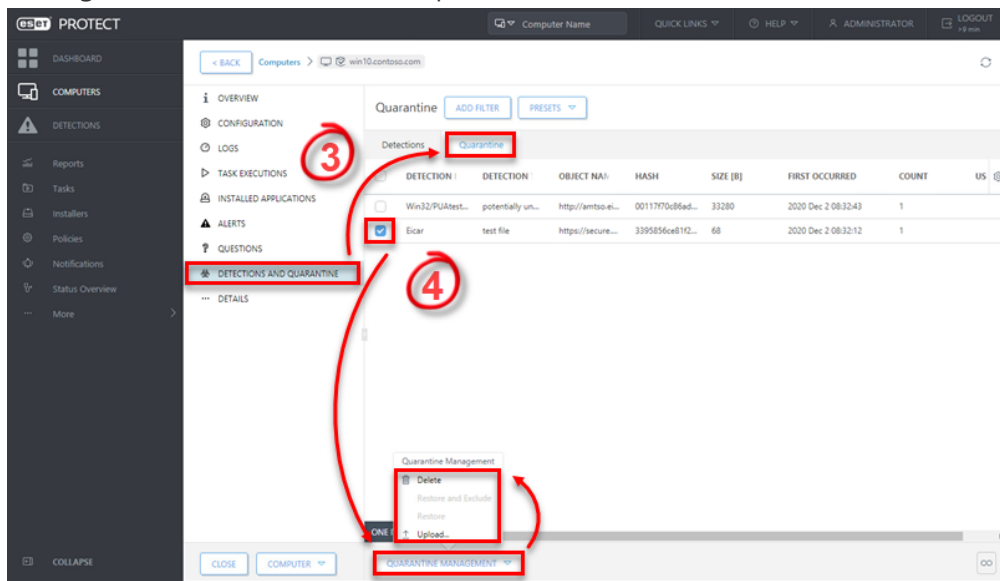

Manage quarantine on an individual client workstation

1. [Open ESET PROTECT Web Console](#) in your web browser and log in.

2. Click **Computers**, click the computer you want to manage, and then select **Show Details**.

3. Click **Detections and Quarantine** → **Quarantine**.
4. Select the check box next to each object you want to manage, click **Quarantine Management**, and then select an option from the context menu.

5. You will see a popup that the task has been scheduled.
