## Migrate exclusions from ESET Inspect on-premises to ESET Inspect Cloud

Lesley | ESET Nederland - 2022-10-24 - [Reacties \(0\)](#) - [ESET PROTECT](#)

### Issue

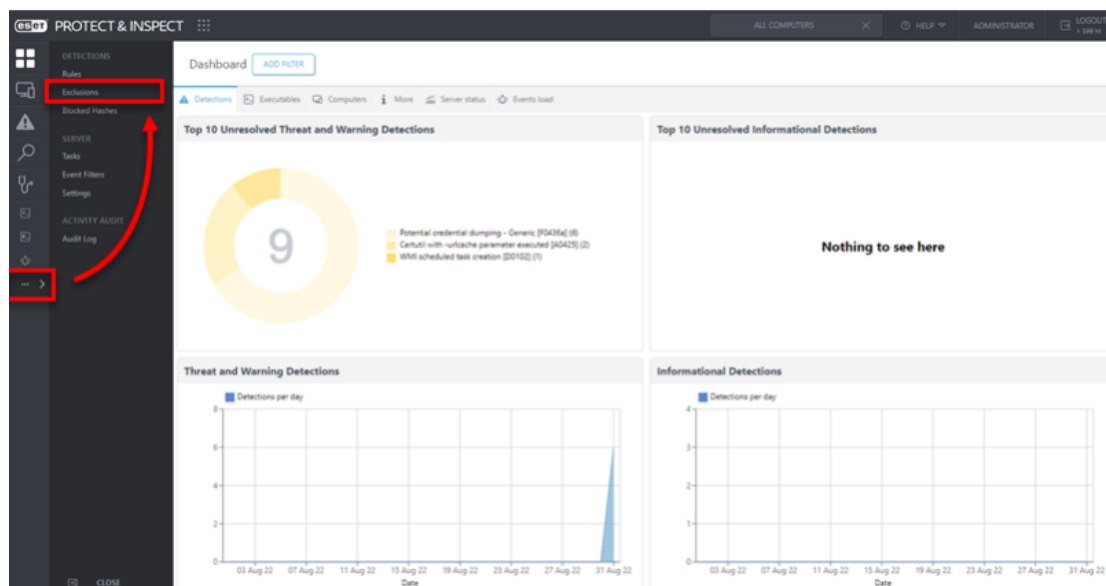

- You want to migrate customized settings from ESET Inspect on-premises to ESET Inspect Cloud
- [Export Exclusions](#)
- [Export Event Filters](#)
- [Export Any Custom Rules](#)
- [Blocked Hashes](#)

### Solution

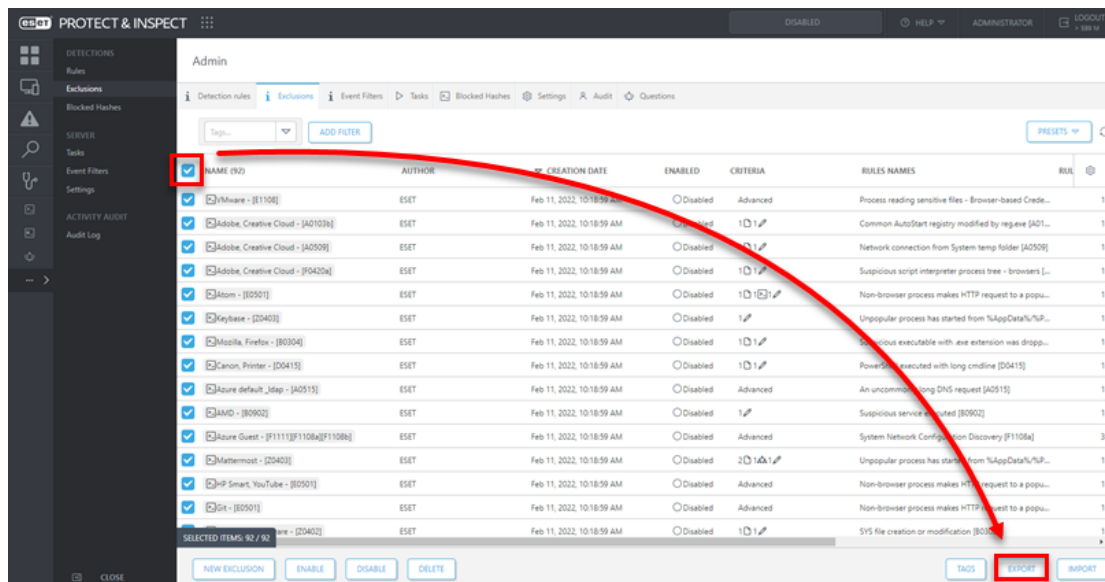

✓ ESET Security Services for ESET Inspect and ESET Inspect Cloud  
ESET offers various [security service packages and additional support](#) for these products. Support for ESET Inspect on-premises and ESET Inspect Cloud is limited and managing rules or exclusions are not included without an ESET Security Service package. Contact a sales representative for further assistance.

### Export Exclusions

1. Click **More** → **Exclusions**.

2. Remove all filters, select the check box next to **Name** and click **Export**.

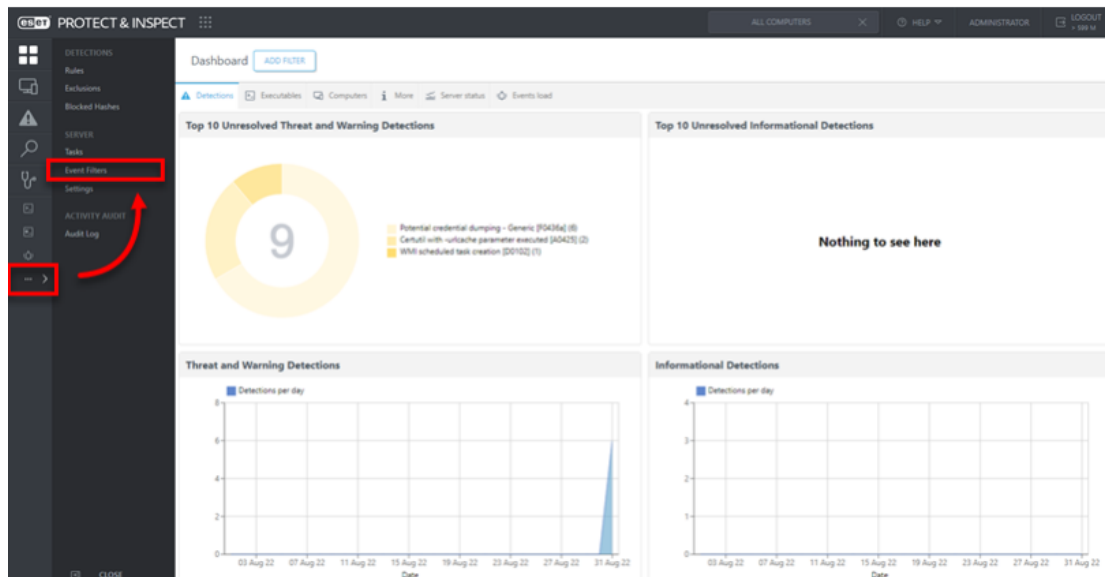

✓ Add recommended exclusions to ESET Inspect Cloud  
[See our Knowledgebase article](#) to view the additional exclusions we recommend adding in ESET Inspect Cloud.

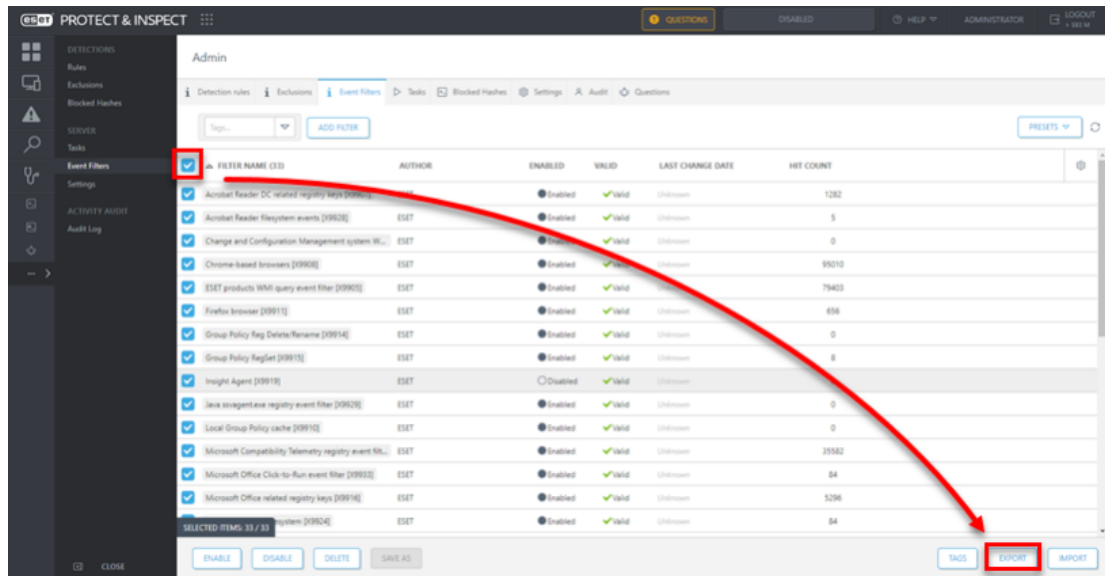

## Export event filter as backup

! Export as a backup only  
 Event filters can only be exported as a backup and will not import into ESET inspect Cloud

1. Click **More** → **Event Filters**.

2. Remove all filters, select the check box next to **Name** and click **Export**.

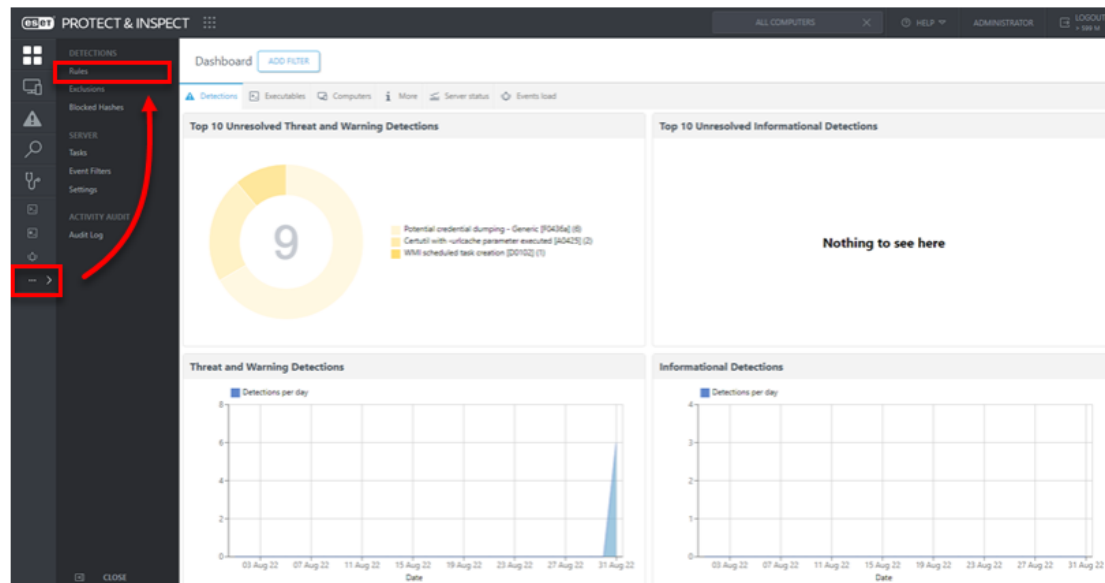

## Export Any Custom Rules

Only export custom rules

We recommend only exporting custom rules that were created by the user.

1. Click **More** → **Rules**.

2. Filter for **Author isNot ESET**, select the check box next to **Name** and click **Export**.

The screenshot shows the 'Admin' section of the ESET Protect & Inspect interface. The 'Detection rules' tab is active, displaying a table of rules. A red arrow points from the 'Export' button at the bottom right to the 'RULE NAME (894)' column header.

<input checked="" type="checkbox"/>	RULE NAME (894)	AUTHOR	ENABLED	VALID	LAST CHANGE DATE	HIT COUNT	SEVERITY	CATEGORY

Buttons at the bottom: NEW RULE, ENABLE, DISABLE, DELETE, SAVE AS, TAGS, CREATE EXCLUSION, RERUN RULES, **EXPORT**, IMPORT.

## Blocked Hashes

1. Click **More** → **Blocked Hashes**.

The screenshot shows the 'Dashboard' section of the ESET Protect & Inspect interface. The 'Blocked Hashes' link is highlighted in the top navigation bar. A red arrow points from the 'More' button in the left sidebar to the 'Blocked Hashes' link.
