

Migrate exclusions from ESET Inspect on-premises to ESET Inspect Cloud

Lesley | ESET Nederland - 2022-10-24 - [Reacties \(0\)](#) - [ESET PROTECT](#)

Issue

- You want to migrate customized settings from ESET Inspect on-premises to ESET Inspect Cloud
- [Export Exclusions](#)
- [Export Event Filters](#)
- [Export Any Custom Rules](#)
- [Blocked Hashes](#)

Solution

ESET Security Services for ESET Inspect and ESET Inspect Cloud

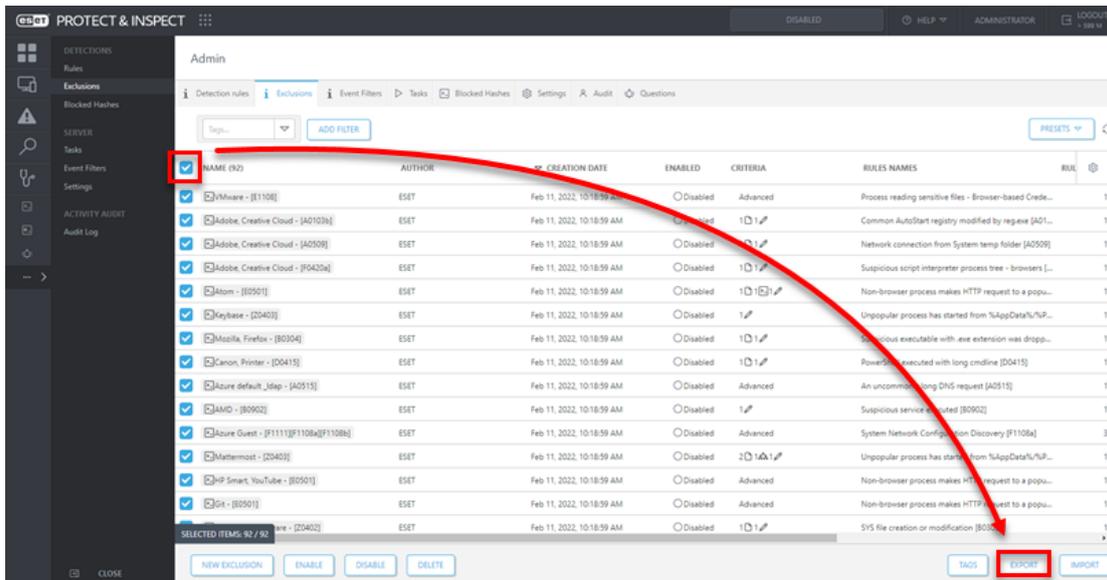

ESET offers various [security service packages and additional support](#) for these products. Support for ESET Inspect on-premises and ESET Inspect Cloud is limited and managing rules or exclusions are not included without an ESET Security Service package. Contact a sales representative for further assistance.

Export Exclusions

1. Click **More** → **Exclusions**.

The screenshot shows the ESET PROTECT & INSPECT interface. On the left, a dark sidebar contains a navigation menu with items like 'DETECTIONS', 'Rules', 'Exclusions', 'Blocked Hashes', 'SERVICES', 'Tools', 'Event Filters', 'Settings', 'ACTIVITY AUDIT', and 'Audit Log'. A red box highlights the 'More' icon (three dots) at the bottom of the sidebar, and a red arrow points from it to the 'Exclusions' item. The main dashboard area is titled 'Dashboard' and includes a 'Detections' tab. It features two donut charts: 'Top 10 Unresolved Threat and Warning Detections' (showing 9 items) and 'Top 10 Unresolved Informational Detections' (showing 'Nothing to see here'). Below these are two line graphs: 'Threat and Warning Detections' and 'Informational Detections', both showing 'Detections per day' over time from August 3, 2022, to August 31, 2022.

2. Remove all filters, select the check box next to **Name** and click **Export**.

Add recommended exclusions to ESET Inspect Cloud

[See our Knowledgebase article](#) to view the additional exclusions we recommend adding in ESET Inspect Cloud.

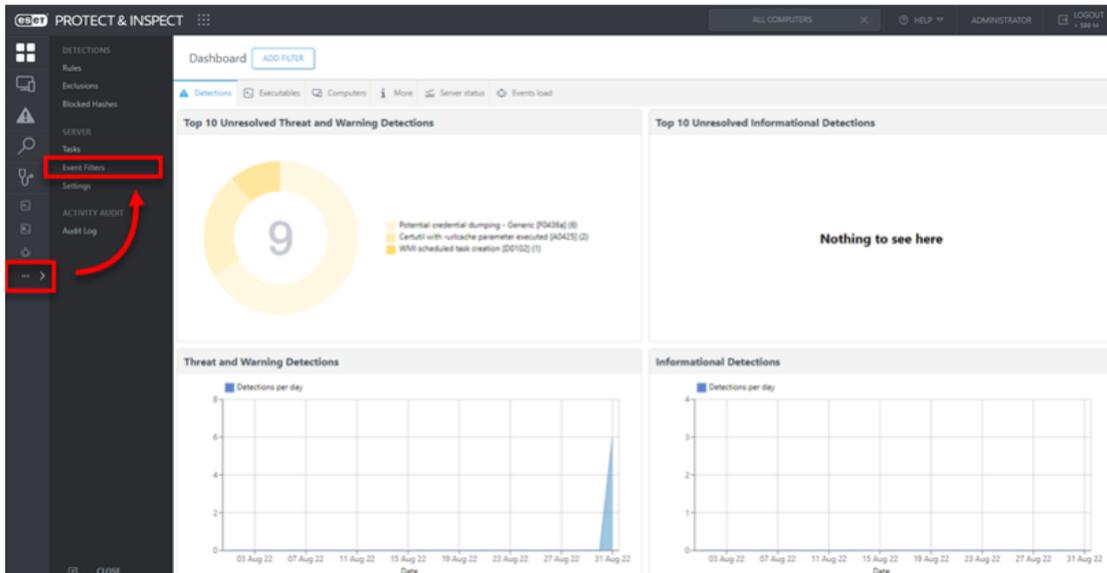

Export event filter as backup

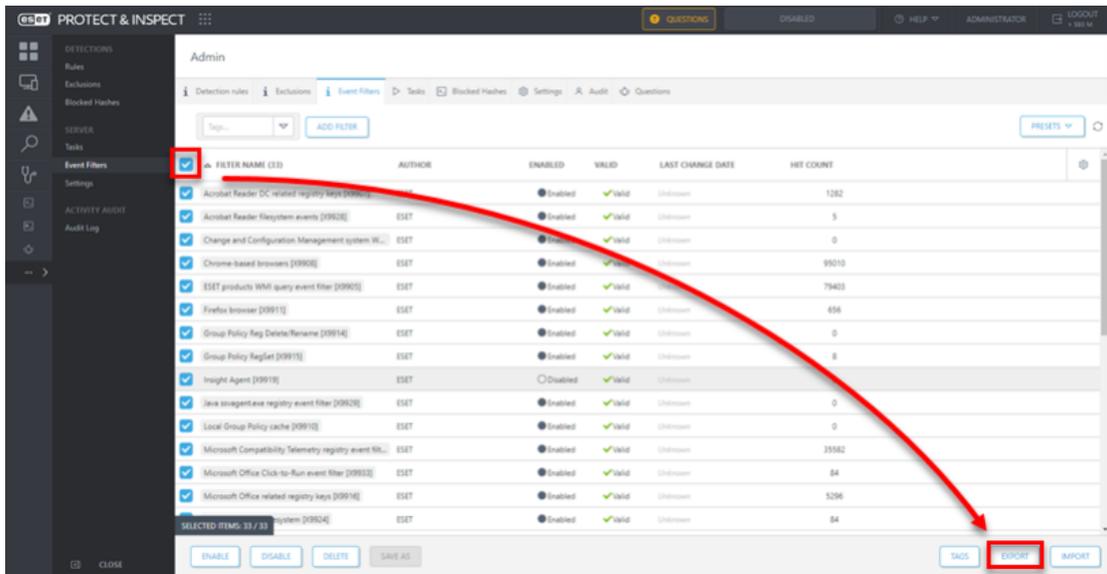

Export as a backup only

Event filters can only be exported as a backup and will not import into ESET inspect Cloud

1. Click **More** → **Event Filters**.

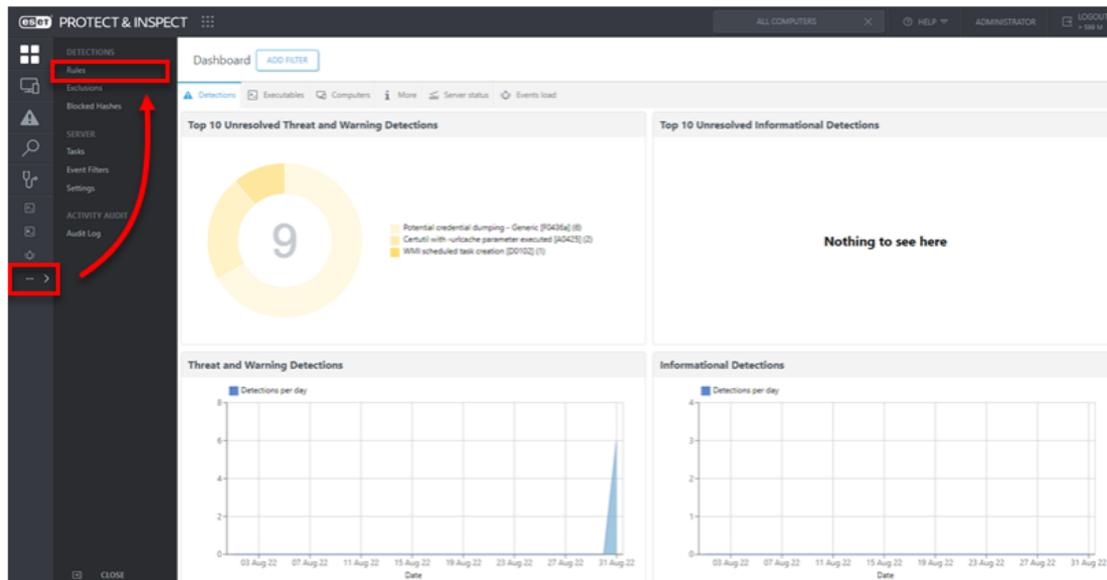

2. Remove all filters, select the check box next to **Name** and click **Export**.

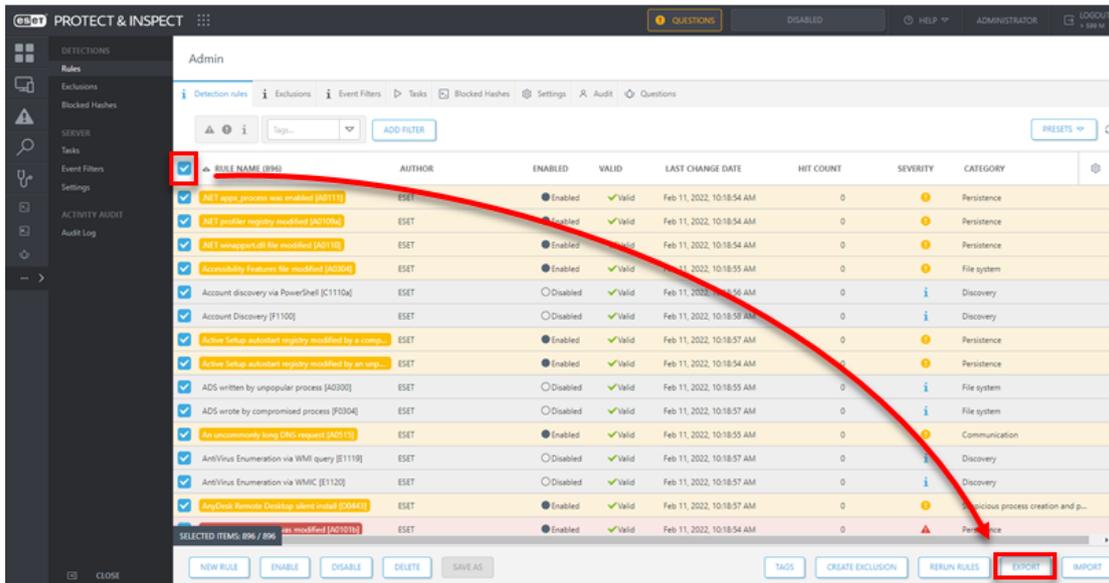

Export Any Custom Rules

 Only export custom rules
We recommend only exporting custom rules that were created by the user.

1. Click **More** → **Rules**.

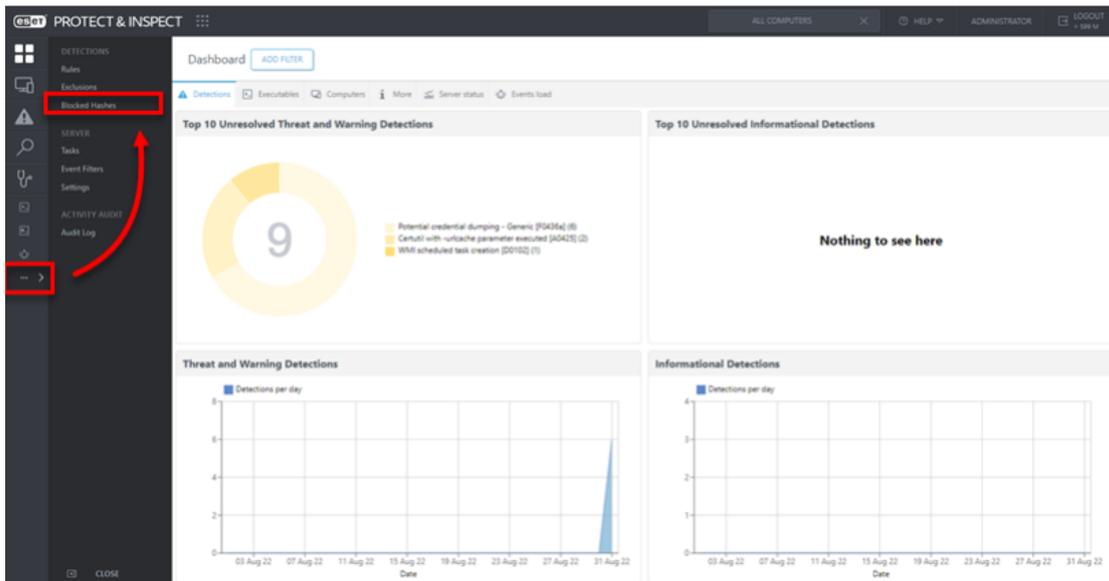

2. Filter for **Author isNot ESET**, select the check box next to **Name** and click **Export**.

Blocked Hashes

1. Click **More** → **Blocked Hashes**.

2. Any blocked hashes must be manually copied over to ESET Inspect Cloud.

NAME (Z)	SHA-1	CLEANED	REPUTATION (EVEGRID#)	POPULARITY (EVEGRID#)	FIRST SEEN (EVEGRID#)	SIGNA
