Migrate exclusions from ESET Inspect on-premises to ESET Inspect Cloud

Lesley | ESET Nederland - 2022-10-24 - Reacties (0) - ESET PROTECT

Issue

- You want to migrate customized settings from ESET Inspect on-premises to ESET Inspect Cloud
- [Export Exclusions](#)
- [Export Event Filters](#)
- [Export Any Custom Rules](#)
- [Blocked Hashes](#)

Solution

ESET Security Services for ESET Inspect and ESET Inspect Cloud
ESET offers various [security service packages and additional support](#) for these products. Support for ESET Inspect on-premises and ESET Inspect Cloud is limited and managing rules or exclusions are not included without an ESET Security Service package. Contact a sales representative for further assistance.

Export Exclusions

1. Click **More** → **Exclusions**.

2. Remove all filters, select the check box next to **Name** and click **Export**.

The screenshot shows the 'Admin' interface for ESET Protect & Inspect. The 'Exclusions' tab is active, displaying a table of exclusion rules. The table has columns for Name, Author, Creation Date, Enabled status, Criteria, Rules Names, and Rule ID. A red arrow originates from the 'Event Filters' menu item in the left sidebar and points to the 'Export' button located at the bottom right of the table.

NAME (92)	AUTHOR	CREATION DATE	ENABLED	CRITERIA	RULES NAMES	RULE

Add recommended exclusions to ESET Inspect Cloud
[See our Knowledgebase article](#) to view the additional exclusions we recommend adding in ESET Inspect Cloud.

Export event filter as backup

Export as a backup only
 Event filters can only be exported as a backup and will not import into ESET inspect Cloud

1. Click **More** → **Event Filters**.

The screenshot shows the 'Dashboard' interface of ESET Protect & Inspect. The 'Event Filters' menu item in the left sidebar is highlighted with a red box and a red arrow. The dashboard displays 'Top 10 Unresolved Threat and Warning Detections' with a donut chart showing 9 detections. The categories are: Potential credential dumping - Generic (9436a) (8), Certutil with -urlcache parameter executed (A0425) (2), and Win scheduled task creation (20162) (1). Below this are two line charts: 'Threat and Warning Detections' and 'Informational Detections', both showing 'Detections per day' from August 3 to August 31, 2022.

2. Remove all filters, select the check box next to **Name** and click **Export**.

Export Any Custom Rules

Only export custom rules

We recommend only exporting custom rules that were created by the user.

1. Click **More** → **Rules**.

2. Filter for **Author isNot ESET**, select the check box next to **Name** and click **Export**.

Blocked Hashes

1. Click **More** → **Blocked Hashes**.

2. Any blocked hashes must be manually copied over to ESET Inspect Cloud.

The screenshot shows the 'Admin' interface for 'Blocked Hashes'. The table contains the following data:

NAME (2)	SHA-1	CLEANED	REPUTATION (LIVEGRID#)	POPULARITY (LIVEGRID#)	FIRST SEEN (LIVEGRID#)	SIGNATURE
<input checked="" type="checkbox"/> C:\comul.exe		<input checked="" type="radio"/> Yes	★★★★★	★★★★★	6 months ago	Trusted
<input checked="" type="checkbox"/> C:\programdata.exe		<input checked="" type="radio"/> Yes	★★★★★	★★★★★	6 months ago	Trusted

ESET Security Services for ESET Inspect and ESET Inspect Cloud
 ESET offers various [security service packages and additional support](#) for these products. Support for ESET Inspect on-premises and ESET Inspect Cloud is limited and managing rules or exclusions are not included without an ESET Security Service package. Contact a sales representative for further assistance.
