## Migrate exclusions from ESET Inspect on-premises to ESET Inspect Cloud

Lesley | ESET Nederland - 2022-10-24 - Reacties (0) - ESET PROTECT

### Issue

- You want to migrate customized settings from ESET Inspect on-premises to ESET Inspect Cloud
- [Export Exclusions](#)
- [Export Event Filters](#)
- [Export Any Custom Rules](#)
- [Blocked Hashes](#)

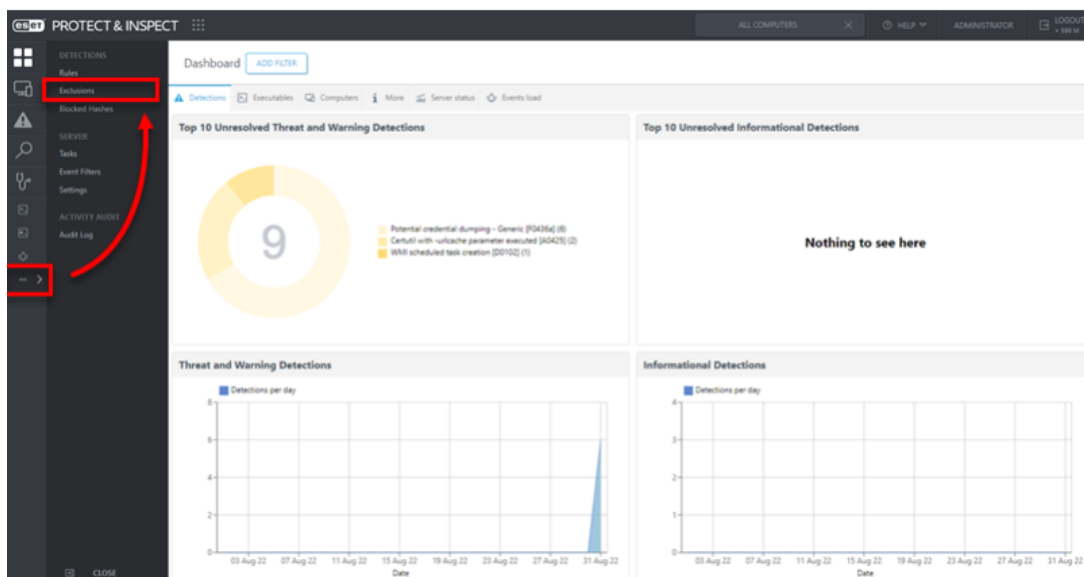

### Solution

ESET Security Services for ESET Inspect and ESET Inspect Cloud  
ESET offers various [security service packages and additional support](#) for these products. Support for ESET Inspect on-premises and ESET Inspect Cloud is limited and managing rules or exclusions are not included without an ESET Security Service package. Contact a sales representative for further assistance.

### Export Exclusions

1. Click **More** → **Exclusions**.

2. Remove all filters, select the check box next to **Name** and click **Export**.

The screenshot shows the ESET Protect & Inspect Admin console. The left sidebar has 'Event Filters' highlighted. The main area displays a table of exclusions with columns: NAME (92), AUTHOR, DATE OF CREATION, ENABLED, CRITERIA, RULES NAMES, and RULE. The 'Export' button is highlighted in red at the bottom right.

NAME (92)	AUTHOR	DATE OF CREATION	ENABLED	CRITERIA	RULES NAMES	RULE

✓ Add recommended exclusions to ESET Inspect Cloud  
[See our Knowledgebase article](#) to view the additional exclusions we recommend adding in ESET Inspect Cloud.

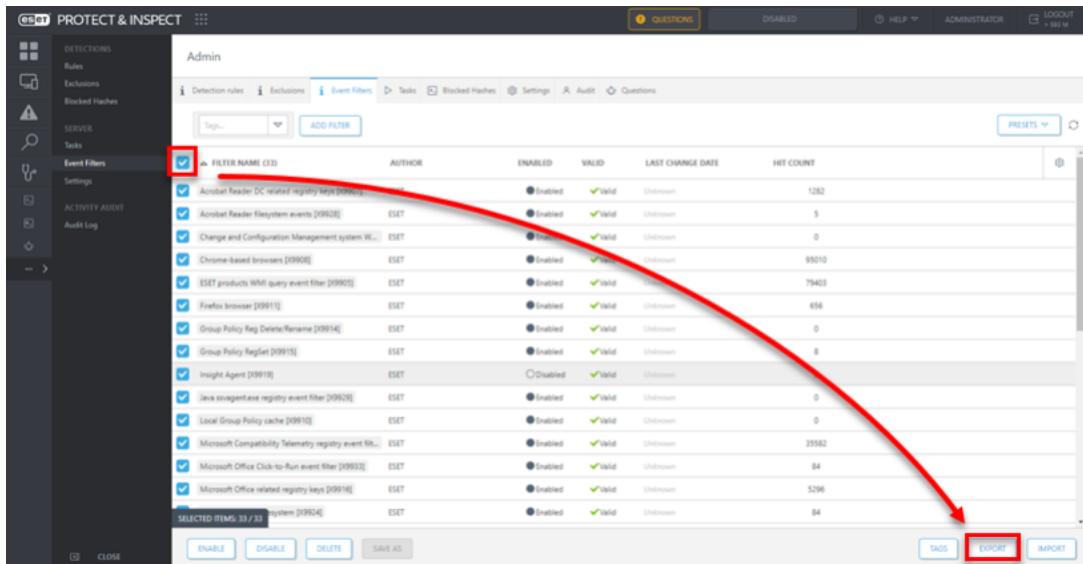

## Export event filter as backup

⚠ Export as a backup only  
 Event filters can only be exported as a backup and will not import into ESET inspect Cloud

1. Click **More** → **Event Filters**.

The screenshot shows the ESET Protect & Inspect Dashboard. The left sidebar has 'Event Filters' highlighted. The main area shows a 'Top 10 Unresolved Threat and Warning Detections' chart with a count of 9, and a 'Top 10 Unresolved Informational Detections' section with 'Nothing to see here'. Below are two line charts for 'Threat and Warning Detections' and 'Informational Detections' showing detections per day.

2. Remove all filters, select the check box next to **Name** and click **Export**.

## Export Any Custom Rules

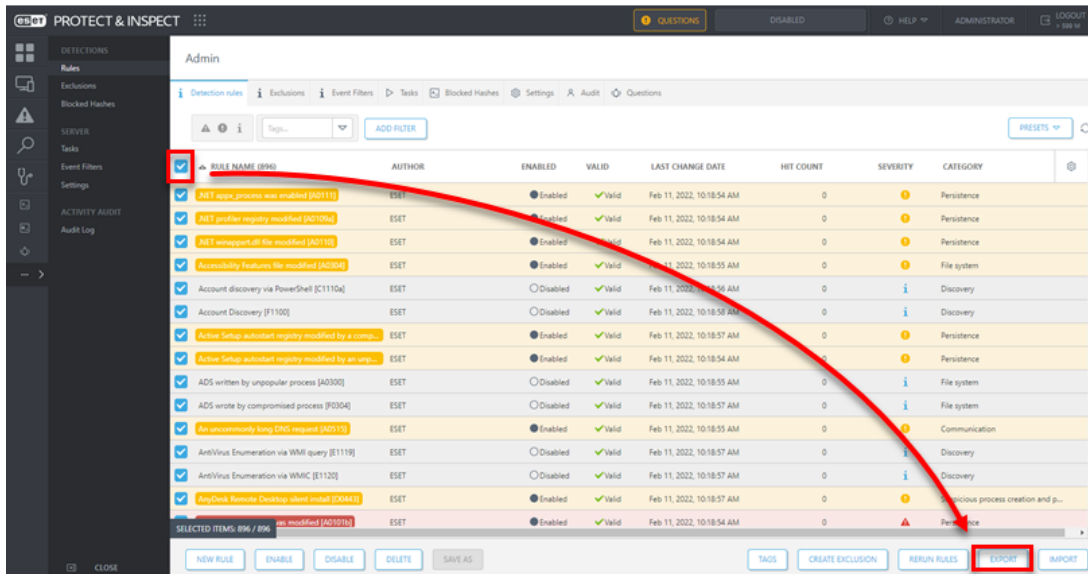

Only export custom rules

We recommend only exporting custom rules that were created by the user.

1. Click **More** → **Rules**.

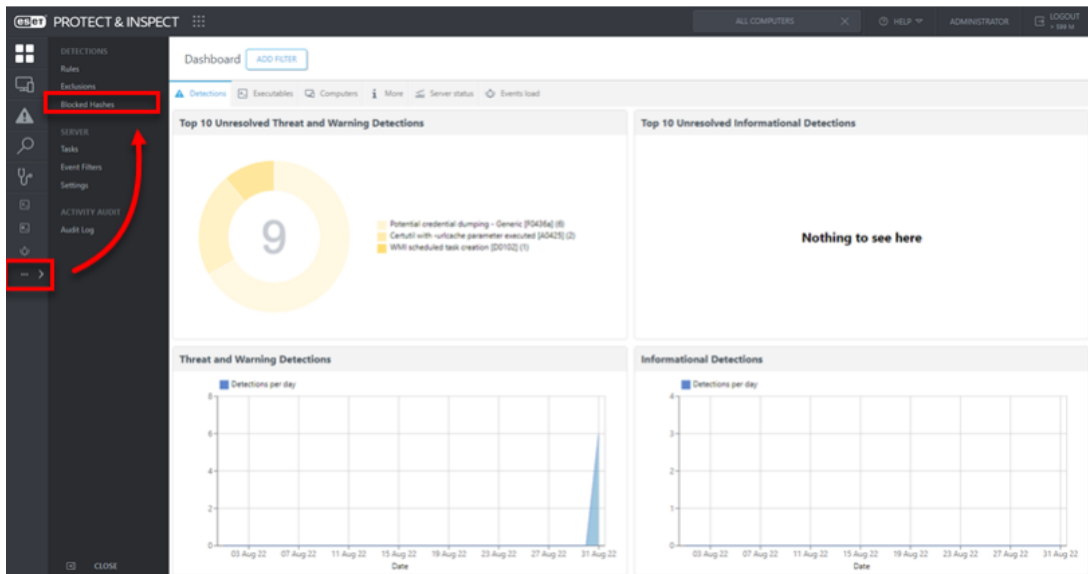

2. Filter for **Author isNot ESET**, select the check box next to **Name** and click **Export**.

## Blocked Hashes

1. Click **More** → **Blocked Hashes**.

2. Any blocked hashes must be manually copied over to ESET Inspect Cloud.

The screenshot shows the 'Admin' interface for 'Blocked Hashes'. The table contains the following data:

NAME (2)	SHA-1	CLEANED	REPUTATION (LIVEGRID#)	POPULARITY (LIVEGRID#)	FIRST SEEN (LIVEGRID#)	SIGNATURE
<input checked="" type="checkbox"/> C:\comul.exe		<input checked="" type="radio"/> Yes	100%	100%	6 months ago	Trusted
<input checked="" type="checkbox"/> C:\programdata.exe		<input checked="" type="radio"/> Yes	100%	100%	6 months ago	Trusted

**ESET Security Services for ESET Inspect and ESET Inspect Cloud**

ESET offers various [security service packages and additional support](#) for these products. Support for ESET Inspect on-premises and ESET Inspect Cloud is limited and managing rules or exclusions are not included without an ESET Security Service package. Contact a sales representative for further assistance.
