Password protect program settings on client workstations from ESET Remote Administrator (6.x)

Ondersteuning | ESET Nederland - 2025-03-07 - Reacties (0) - 6.x

https://support.eset.com/kb3703

Issue

ESET program settings are not password-protected on client workstations

Solution

Version 6.1.2227 and later only

The steps below will only work on ESET Remote Administrator and ESET Endpoint Antivirus / ESET Endpoint Security version 6.1.2227 and later (and ESET File Security for Microsoft Windows Server 6.2.x and later).

If you do not use ESET Remote Administrator to manage your network

Perform these steps on individual client workstations.

Password protect settings on client workstations using ESET Remote Administrator

Permissions changes in ESET Remote

administrator 6.5 and later

Before proceeding, please note important changes to user access rights and permissions in the latest versions of ESET Remote Administrator.

View Permissions Changes

View permissions

Once these permissions are in place, follow the steps below.

1. Open ESET Remote Administrator Web Console (ERA Web Console) in your web browser and log in.
2. Click **Admin** → **Policies** and then select the policy that you want to modify.
3. Click **Policies** → **Edit**.

Password protect settings on individual client workstations

1. Open ESET Endpoint Security or ESET Endpoint Antivirus. Open my ESET product.

2. Press the **F5** key to open the Advanced setup window (if you are using a tablet, tap **Setup** → **Advanced setup**).

3. Click **User Interface**.

4. Expand **Access Setup** and click the slider bar next to **Password protect settings**.

Figure 2-1

5. Type the password into the **New password** and **Confirm password** fields and click **OK**.

Figure 2-2

6. Click **OK** to save your changes and exit the Advanced setup window.
