Run a component-based (custom) installation of ESET Endpoint Security from ESET Remote Administrator (6.x)

Ondersteuning | ESET Nederland - 2017-11-06 - Reacties (0) - 6.x

<https://support.eset.com/kb5953>

Issue

Install only certain components of ESET Endpoint Security on client workstation(s)

Typical push installations

If you want to perform a typical push installation, please see the following Knowledgebase article:

[Deploy or upgrade ESET endpoint products using a push install \(6.x\)](#)

Solution

Before proceeding

Before running a software install task, [make sure that the ESET Remote Administrator Agent \(ERA Agent\) is installed](#) on the target computers. Also, be sure to complete all of the items on our [ESET Remote Administrator Push Installation Requirements and Checklist](#).

1. Open ESET Remote Administrator Web Console (ERA Web

Console) in your web browser and log in. [How do I open ERA Web Console?](#)

2. Click **Admin**  → **Client Tasks**, expand **Operating system**, click **Software install** → **New**.

Figure 1-1

Click the image to view larger in new window

3. In the **Basic** settings section, give your installation task a **Name** and optionally a **Description**. The **Task** drop-down menu will automatically be set to **Software Install**.

Figure 1-2

Click the image to view larger in new window

4. Expand the **Settings** section and select the check box next to **I agree with application End User Agreement**.

Version 6.2 and earlier: Expand the **Target** section and click **Add Targets** → **Add Target(s)**. Groups in your network will be displayed in a tree. Click a group to view computers or subgroups of that group. Select the check box next to a group or computer to add it as a target. Click **OK** when you are finished.

5. Click **<CHOOSE ESET LICENSE>**, select the appropriate license for the ESET product you will deploy to clients and then click **OK**. If you have not yet added product licenses, [click here for instructions to add product licenses in ERA](#).

Click the image to view larger in new window

6. Choose a **Package to install** option. You can choose **Install package from repository** or **Install by direct package URL** to select the package that will be installed on target clients:

If you are upgrading to Windows 10, Install by direct package URL

To ensure that clients on your network receive the latest Windows 10-compatible version of your ESET endpoint product, enter the appropriate URL for your ESET endpoint product(s) in the **Install by direct package URL** field:

ESET Endpoint Security 6

bit: https://download.eset.com/com/eset/apps/business/eea/windows/latest/avremover_eea_nt32_enu.exe

64-

bit: https://download.eset.com/com/eset/apps/business/eea/windows/latest/avremover_eea_nt64_enu.exe

Install package from repository

To install a package from the repository, select **Install package from repository** and click **<CHOOSE PACKAGE>**. Select the ESET product that you want to install on client computers and then click **OK**. [Do I have the latest version of ESET business products?](#)

Figure 1-4

Install by direct package URL

To install a package by entering the target URL, select **Install by direct package URL** and type the package URL into the

corresponding field. [Do I have the latest version of ESET business products?](#)

Figure 1-5

Click the image to view larger in new window

7. Type your installation parameters into the **Installation Parameters** field. [Click here for a full list of supported parameters.](#)

Figure 1-6

Click the image to view larger in new window

8. Click **Finish** when you are finished making changes to your task.

ESET Remote Administrator version 6.2.11 and earlier:

Adding targets is done during task creation (for example, after adding a new task and giving it a **Name**, click **Target** to add groups or clients to the task).

9. Click **Create Trigger** when you are asked whether you want to add a trigger for the client task. For instructions to assign a trigger to a **Client Task**, see the following ESET Knowledgebase article:

- [How do I create a Trigger and add Target computers or groups to execute a Client Task? \(6.3\)](#)
