Should I install ESET Mail Security for Microsoft Exchange Server on each node in a cluster?

Ondersteuning | ESET Nederland - 2017-11-21 - Reacties (0) - ESET Mail Security for Exchange Server

We recommend installing ESET Mail Security for Microsoft Exchange Server on every node when deployed in a cluster environment. This will ensure that in the case of a failover in the cluster, you will still be protected by ESET Mail Security for Microsoft Exchange Server on the newly active node.
