# What's new in ESET Endpoint Security / ESET Endpoint Antivirus 6?

Ondersteuning | ESET Nederland - 2025-03-07 - Reacties (0) - Legacy https://support.eset.com/kb3611

### **Details**

### Solution

New Features | Improved Features | Changelog | Known Issues (opens in new window)

## New Features in version 6

**New graphical interface**—A high-resolution, touch-screen compatible interface with easy access to the features and tools you use most.

**Anti-Phishing**—Protects you from attempts to acquire your password and other sensitive information by restricting access to malicious websites that impersonate legitimate ones.

**Botnet Protection** (EES only)—Helps discover malware by analyzing network communication patterns and protocols.

**ESET Shared Local Cache**—Improved performance in virtualized settings. The use of a shared local cache decreases scan times when using ESET Endpoint products with VMware or Hyper-V solutions.

**Native 64-bit scanning**—Further reduces system footprint and allows for the fastest, most efficient scans.

New or improved features in version 6.6.2046.0 (as compared to 6.4.2014.0)

Added: Native 64-bit scanning core. Reduces system footprint and

allows for the fastest, most efficient scans.

Added: Command-line management interface allows for direct management of Endpoint without ESET Remote Administrator (RMM interface)

Added: Users can now export scan logs in text format

Added: Ability to select logging severity for firewall rules, HIPS rules and protocol filtering URL lists for user reporting events to ESET Remote Administrator

Added: Notification is displayed when connecting to an unprotected WiFi network

# New or improved features in version 6.4.2014.0 (as compared to 6.3.2016.0)

Added: Support for the visually impaired

Added: Support for bundle installer when creating installation

package from ESET Remote Administrator

Added: Support for Digest authentication during communication

with ESET update servers

Added: Support for HTTP proxy fallback in case connection to

proxy fails
Changed: Wording adjusts

Changed: Wording adjustments for certain tooltips and help pages

Fixed: Other minor bug fixes

## New or improved features in version 6.3

Web threat detection for threats caused by browser vulnerabilities or browser plug-ins (Java, Flash, Silverlight)

Ability to perform one action for additional viruses found after scan

Seat name added to Help and support page as custom name for endpoint seat

Automatic update of product from removable media Ability to hide license expiration messages and information XML files generated from ESET Endpoint 5 are correctly imported to ESET Endpoint 6

Driver support for 3G modems and similar connection devices Updated AV Remover to most current versionWeb control—Now allows you to create "soft" (situation-based) blocking policies and partially customize the blocking and warning page.

## Full changelog for version 6.3.2016

Added: Web threat detection for threats caused by browser vulnerabilities or browser plug-ins (Java, Flash, Silverlight)

Added: Ability to perform one action for additional viruses found after scan

Added: Seat name added to Help and support page as custom name for endpoint seat

Added: Automatic update of product from removable media Added: Ability to hide license expiration messages and information

Added: XML files generated from ESET Endpoint 5 are correctly imported to ESET Endpoint 6

Added: Driver support for 3G modems and similar connection devices

Added: Updated AV Remover to most current version

Fixed: Idle-state scanning running when computer is locked even though it is set to run on screensaver only

Fixed: AV Remover crashes when two installation processes run

simultaneously with AV Remover scanning

Fixed: Updated the Protection Status message "Installation is out of date" when no update task is scheduled (it now states "No regular updates scheduled" both on the endpoint and in ERA) Fixed: Error using the Repair feature if the endpoint product is

Fixed: Endpoint is not assigned to dynamic group "License expired" when license is expired

installed from repository

Fixed: Incorrect device name displays in the "New device detected" window

Fixed: The endpoint product incorrectly detects the system as fullscreen when moving tabs in Microsoft Edge and causes Presentation mode to start

Fixed: Presentation mode starts when RDP connection is opened in full-screen mode on second monitor

Fixed: Option to select second update server in scheduler is grayed out if primary update server is set to default Fixed: Added scrollbar indicating time remaining in case of

migrating endpoint containing a large Web control list (50k+ links)
