Which ESET File/Mail/Gateway Security agents can I use with my license?

Ondersteuning | ESET Nederland - 2025-03-07 - Reacties (0) - Legacy

Issue

> Using ESET File, Mail, or Gateway products, you receive the following errors written to the log file:
>
> Child process smfi[7307] terminated with return code 69, restart in 60 seconds
> Child process smtp[7148] terminated with return code 70, won't be restarted'

Details

Solution

Verify that a valid license file (*.lic) exists for your ESET product in the */etc/esets/license* directory.

A valid license for **ESET File Security** will allow you to use these ESET agents:

```
esets_dac
libesets_pac.so
esets_scan
```

A valid license for **ESET Mail Security** will allow you to use these ESET agents:

```
esets_cgp
esets_cli
esets_imap
esets_mda
esets_pipe
esets_pop3
esets_smfi
```

```
esets_smtp
```

A valid license for **ESET Gateway Security** will allow you to use these ESET agents:

```
esets_ftp
esets_http
esets_ssfi.so
esets_icap
```
