ESET Cloud Office Security v774 (Service release) has been released.

Changelog

- **Added** ELGA usage statistics to file and email reports, providing better visibility into feature adoption.
- **Added** support for customizable CSV exports, allowing you to select which columns are included before downloading.
- **Improved** the accuracy of the Unprotected Users dashboard metric to show only users eligible for protection.
- **Added** new condition types to the policy rule engine, providing greater flexibility when creating protection policies.
- **Enhanced** scan logs with more detailed information about actions performed by the rule engine.
- **Improved** policy import handling by allowing imports to continue when inaccessible objects are referenced.
- **Added** more detailed reporting for objects that are skipped during policy import.
- Audit logs now record when objects are skipped during policy import operations.
- **Added** support for viewing and filtering archived users in Google Workspace environments.
- **Expanded** user filtering and export capabilities with archived status and Microsoft 365 license information.
- **Added** visibility of user and group synchronization status in Tenant Settings.
- **Added** a new Section filter to Audit Logs for easier navigation and troubleshooting.
- Tables now remember their position after closing a detail view, improving navigation efficiency.
- **Added** visibility of Microsoft 365 and Google Workspace Tenant IDs directly in the portal.
- The About page now displays the datacenter hosting your ECOS instance.
- **Added** a quick Open Detail action to name columns across RBAC, Reports, and Policies views.
- **Improved** the overall usability and layout of the Tenant Settings screen.

- **Added** a “Created” timestamp field to Syslog messages for improved event tracking and integration.
