ESET Endpoint Encryption Client 5.3 has been released

2024-06-26 - Steef | ESET Nederland - **[Reacties (0)](#)** - [Feature release](#)

ESET Endpoint Encryption Client version 5.3 has been released.

Changelog

- NEW: AES256 key support to granular and removable media encryption on managed clients

- NEW: Virtual disks formatted as exFat allowing virtual disks larger than 500GB to be created

- NEW: Added Turkish Q & F keyboard layouts to the pre-boot environment

- NEW: New Credential Provider introduced to ensure Single Sign-On (SSO) functions in Windows 11 24H2

- NEW: SSO supported when resuming from hibernate

- IMPROVED: When disabling pre-boot authentication, Full Disk Encryption (FDE) now leverages the Trusted Platform Module (TPM) when the system is encrypted using TPM

- IMPROVED: Encrypted virtual disks are now mounted as removable devices

- IMPROVED: Explorer is now refreshed for all logged-in users, ensuring that unmounted drives are not left visible

- FIXED: A problem on Microsoft Surface devices where the system would not boot after turning on Secured Core

- REMOVED: Support for 32-bit operating systems

- REMOVED: Support for Server 2012 and Server 2012 R2
