ESET Mail Security for Microsoft Exchange Server version 12.0.10003.0 has been released

2025-04-11 - Steef | ESET Nederland - Reacties (0) - Feature release

ESET Mail Security for Microsoft Exchange Server version 12.0.10003.0 has been released and is available for download.

Changelog

- NEW: SIEM exports now support TLS
- NEW: Microsoft 365 On-demand scan can be run on cloud mailboxes outside of hybrid environments
- NEW: ESET Shell now supports commands to extract usernames and passwords from PowerShell PSCredential object or from Windows Credential manager
- NEW: Support for Vulnerability patching logging and reports in ESET PROTECT
- NEW: Support for Vulnerability scan reports in ESET PROTECT
- NEW: ESET Shell now supports V&PM scan scheduler tasks
- NEW: Exclusions from network isolation
- NEW: Support for Microsoft Windows Server 2025
- NEW: Support for Microsoft Exchange Server CU15
- IMPROVED: Notification emails triggered by rules will contain all information about rule hits in one notification instead of generating a notification for each rule
- IMPROVED: Extended automatic exclusions to cover also %SystemRoot%\Cluster and %SystemRoot%\Temp\OICE_<GUID>
- IMPROVED: SMTP protection log extended to include logs about SPF passes and technology that accepted it, for example ARC
- IMPROVED: SPF failure can be overridden by the valid ARC signature, preventing certain unnecessary SPF rule triggers
- IMPROVED: The event log contains information about SPF result override on the basis of a valid ARC signature
- IMPROVED: Secure interaction between UI components and password settings

- IMPROVED: Search in Advanced setup, including highlighting matching items
- IMPROVED: Outlook mail plugin improvements and various issues fixed
- IMPROVED: The auto-exclusion logging mechanism, which records only the first instance of an error to prevent log overflow, now resets when a change in the auto-exclusion setting
- CHANGED: Advanced settings and component installation tree were consolidated and adapted to match the structure used in other ESET security products
- CHANGED: ESET Shell commands were adapted to the advanced setting changes and consolidation
- CHANGED: ESET Shell status commands are now organized in one context and its sub-contexts
- FIXED: A problem where rules with the message body condition with diacritics were not being evaluated correctly

Known issues:

- Vulnerability scans cannot currently list vulnerabilities for the Windows Server Operating systems
