# Pre-release announcement: ESET PROTECT Cloud 4.2

2023-02-20 - Steef | ESET Nederland - [Reacties (0)](#) - [Releases](#)

**Release notes:**

- The release process, as usual consists of several individual (internal) tasks/activities which will be executed from **21.2.2023** (starting 9:00 CET) - to **7.3.2023**.

- Mind the fact, that due to thousands of ESET PROTECT Cloud instances, the upgrade will happen in phases (gradual roll-out to individual instances) from 21.2.2023 - 7.3.2023 to secure smooth operation of the whole cloud service.

- Individual customers will be impacted in a minimal way. From their point of view, updates will require minimal downtime. Individual customer's instance would be inaccessible up to 15 minutes. Upgrades will happen out of business hours.

- New customers will not be affected, as a newly generated instance would be on the latest version from the very first moment.

- The security of the network will not be affected.

**Changelog:**

- ADDED: Detections are grouped by common attributes

- ADDED: Migration of mobile devices to cloud MDM

- ADDED: Syslog includes the operating system of a computer, and the full hierarchy and description of a static group

- ADDED: Product Navigator has a link to ESET Cloud Office Security

- IMPROVED: Active Directory Synchronization (time of last sync, ability to deactivate and regenerate token)

- This improvement is available with Active Directory Scanner v1.2 ([link](#))

- FIXED: Incorrect filter behavior when multiple license statuses are selected

- Various other minor improvements and bug fixes

I would like to share with you a version of the What's new document that is labelled FOR RESELLERS: https://techcenter.eset.nl/en-US/downloads/files/eset-protect-cloud-42 Which means we encourage you to use this material -- to spread the word about the new version to demonstrate how our teams continually improve the

interface of the ESET PROTECT Platform.

**Product/Service**: ESET PROTECT Cloud

**Build Information / Service version**: EPC 4.2

**Languages**: All
