Release Announcement: ESET Endpoint Antivirus/Security for Windows 8.0.2028.0

2020-12-09 - Mitchell | ESET Nederland - [Reacties (0)](#) - [Releases](#)

Version 8.0.2028.0

- **Important: During upgrade from earlier versions, an immediate reboot is required to allow real-time file-system protection to reinitialize and become fully functional**
- Added: Secure browser
- Added: Windows Management Instrumentation and full Registry scan
- Added: Automatic security & stability updates
- Added: Unified exclusions for Network attack protection components (IDS)
- Added: Micro Program Component Update with auto-preset and feature updates
- Added: ESET PROTECT Cloud version 8.0 compatibility
- Added: Windows 10 October 2020 Update (version 20H2) compatibility
- Fixed: ESET Security Management Center (ESMC) alert section entries are not displayed correctly when a Secure browser is paused
- Fixed: Problems with header and columns alignment in table arrays
- Fixed: Cyclic displaying of "Computer restart required" after operating system reboot
- Fixed: Windows Installer (msiexec.exe) allows uninstallation of 32-bit product variant without password under certain circumstances
- Changed: Removed DNS-fallback channel for background cloud services

Installers are available on the [download section](#) of our website and the ESMC repository.
