Release Announcement: ESET Full Disk Encryption 1.4.58.0

2024-01-24 - Mitchell | ESET Nederland - Reacties (0) - Hotfix

Changelog for EFDE 1.4.58.0

- Added: Automatic application updates now use the proxy settings
- Fixed: A problem where multiple disks would be grouped as one within the UI
- Fixed: A problem where upgrading to version 1.4 caused black screen when booting on systems with older UEFI implementations
- Fixed: The bootloader now adheres to the 'User can change password' policy
- Fixed: A problem where proxy settings were not being applied
- Fixed: A problem where the product could become deactivated randomly
- Fixed: A problem with keyboard keys in the bootloader. When Caps Lock was on and combined with modifier keys (SHIFT, CTRL, etc) the wrong characters would be outputted
- Fixed: A problem when EFDE automatically updated, a status message would show stating the update had failed
- Fixed: A problem in certain environments which would cause the Agent Interface Service to crash
