# Release Announcement: ESET Inspect & ESET Inspect Cloud v1.8.2211.0

2022-10-14 - Steef | ESET Nederland - Reacties (0) - Releases

I am happy to announce the release of ESET Inspect and ESET Inspect Cloud version 1.8. The on-prem version is available to download (links below + available via ESET PROTECT repository) since yesterday, the 13th of October, and cloud instances are being updated with an estimated completion today by end of business.

This version introduces a major change in EI's architecture (moving the evaluation of Detection Rules from the EI Server to the EI Connector) and various other smaller changes.

### Changelog:

- Major functionality
  - o Moving of Detection Rules evaluation from the central EI Server to individual endpoints
  - o ESET MSP Administrator integration
- Database improvements
  - o Partitioning of Processes table
  - o Display Purge status overview
- Detection capability improvements
  - o Ability to monitor SYS Files
  - o Ability to monitor Kernel module load/unload operations on Linux
- Response capability improvements
  - o Computer Reboot and Shutdown exposed to Rule engine as response actions
- UI improvements
  - o Alignment of context menus and toolbars to match ESET PROTECT
  - o Ability to go from Process's raw events to Computer's raw events
- Cloud specific improvements
  - $\circ\;$  ISO certification achieved for ESET Inspect Cloud
  - o SLAM integration (internal only)
  - o Flexible Servers (internal only)
  - o Central redirectors in US and Japan (internal only)
  - $\circ\;$  Instance UUID displayed in the About section

**Documentation:** What's new in ESET INSPECT v1.8

## Known Issues

 $\bullet\,$  Installation of the on-prem EI Server can take quite a long time in large environments

# Planned release date

- 13. October 2022 for on-prem
- Throughout 13. and 14. October for cloud instances

# **Installation packages**

- On-prem EI Server and EI Connectors download <a href="here">here</a> and/or deploy via ESET PROTECT
- For ESET Inspect Cloud first check whether your instance has been updated to v1.8 and if yes, proceed with update of EI Connectors via ESET PROTECT Cloud

## **Installation notes**

- Update EI Server to 1.8 first and EI Connectors afterwards
- EI Server v1.8 is compatible with v1.7 EI Connectors but not the other way around
