Release Announcement: ESET PROTECT Cloud 4.3.8.1

2023-05-02 - Steef | ESET Nederland - Reacties (0) - Releases

Product/Service: ESET PROTECT Cloud

Build Information / Service Version: Service version: 4.3

Release Stage: Public release

Languages: All

Changelog:

•ADDED: An MDR Report Template for offices and partners delivering ESET Services

•ADDED: A column for mobile device IMEIs in the device list and the possibility to filter the devices by IMEI

•ADDED: The ability to combine Computer name, Database version and Last connection in one report

•IMPROVED: Extended certificate validity for mobile devices - devices do not need to connect to an MDM server frequently to stay protected

•FIXED: Issues with displaying the Product Tour in the Safari browser

•FIXED: Various localization bugs

•Other minor improvements and bug fixes
