Release announcement: ESET Server Security for Microsoft Windows Server 9.0.12017.0 (hotfix)

2023-01-30 - Steef | ESET Nederland - Reacties (0) - Hotfix

This new version contains fixes and improvements for issues related to Windows updates, rebooting, product installation and other minor fixes. Additionally, Ukrainian localization for product and documentation is available from this version. For these reasons, it is recommended to update the product to this latest version.
The release to web/repository is planned for 30 January and will be followed by first phase of Auto-update/uPCU release (50%) on 13 February, while the last phase (100%) is scheduled for 27 February. In order to speed up the process and receive update right after the web/repository release administrators can use "Check for updates" button available in the application GUI.
